- > Spot prices of US yellow corn grains increased by 10.06% compared to last month's level from US\$169/MT in August 2010 to US\$186/MT in September 2010.
- > Pacific North West corn grains rose by 0.96% to settle at US\$211/MT in September 2010 as compared to US\$209/MT in August 2010 level. The increase in global corn prices was attributed to severe drought encountered by Russia .
